Also, the either version has about 150,000 people from Peters' current district and 555,000 from Levin's contained in the new 9th

The attached map (V2) places Troy – except for three precincts, and one in which Marty lives – in the 11th in exchange for the Bloomfields, Birmingham and Southfield Twp. As you can see from the chart below, there is virtually zero impact on the political data of this configuration compared to the V1. The big difference is that Peters would be in the 9th along with Levin and Marty.

There are no changes to anything in the V1 Pontiac-Detroit plan except for the swap of Troy for the Bloomfields etc.
